

Full Stack Software Engineer (Artificial Intelligence) – Sydney, Australia

Role Details

As part of a small, tight-knit development team, you will have the opportunity to design, develop and maintain Flamingo Ai's Software as a Service platform. You will also be involved in exciting developments, such as implementing new product features, contributing new ideas and working on our tech stack. This includes working on CI/CD pipeline and Machine Learning capabilities as well as continually enhancing the product's features and performance using an Agile (Scrum) development framework.

At Flamingo Ai, we are utilising kubernetes and docker to run our micro service orientated system running node for platform services with a react based front-end and python for the Machine Learning services. Technical decisions are made with input from the whole team and we encourage everyone to speak their ideas and thoughts.

As a new member of the Flamingo "Flamboyance" you will have the opportunity to take part in our employee stock ownership plan.

About Flamingo Ai

Flamingo Ai (ASX: FGO) is an Australian start-up developing a unique Cognitive Virtual Assistant based on its Artificial Intelligence and Machine learning technology. This is a unique opportunity to join a high profile young Ai company and play a significant role in the company's growth and performance. We call ourselves the "Flambos". We thrive through our fast-paced, high-intensity environment, but also are all about team work, work-life balance and fun!

The Company is based in Sydney (AU) and Hartford (USA).
